Treating new patients on skype.

For patients wishing to consult with me on skype for the first time I offer a free introductory 15min session to assess patient suitability.

During this initial assessment the following will also need to be addressed so that a treatment contract can be formed.

1. Establishing whether remedies are easily available to the patient in an acute case
2. Accessibility in relation to different time zones.
3. Patient suitability-some conditions are easier to treat than others. Working with patients with serious pathology or medical conditions are less suited to this form of consultation.
4. Confidentiality-the patient must take steps to ensure a reasonable level of confidentiality and take responsibility for electronically stored information.
5. Referral procedures for people living outside of the UK .
6. Professional codes and law that apply to me as a Homeopath living in the UK.
7. Payment information including paypal.

At the end of the assessment the patient will be asked to complete a consent form affirming that they have understood the nature of the consultation being offered.

Appointment availability and response expected from the practitioner to the client will be the same as non skype clients.

I affirm that I have understood the nature of the treatment being offered. Please tick.
